Integral University

B.sc (Mathematics & computer Science)

2021 – 2024

Lucknow, India

Relevant Coursework

- Web Development
- MERN Development
- Software Testing
- Database Management
- SEO in Website
- Artificial Intelligence

Experience

Han digital solution Pvt Ltd

July 2024 – Sep 2024

Process Associate

Bangalore, India

During my time as a Process Associate at Data annotation use sage maker tool in Indian, I was responsible for ensuring the accuracy and quality of data annotation using the sage maker tool. I was also involved in process improvement initiatives to streamline workflows and increase efficiency.

- Quality Control for Annotation
- Process Improvement Initiatives
- Utilized Sage Maker Tool for Data Annotation
- Collaborated with Team members on Projects

CodeSpaze

Oct 2024 – Dec 2024

Web developer Intern

- Personal Portfolio Website (React.js)
- Developed a Responsive Portfolio Website using React.js, Featuring Home, About, Services, Work Experiences, Team Members, and Contact Pages.
- Showcase Skills, Projects, and Professional Experiences with Smooth Navigation and Optimized Performances.

Projects

Car Rental Service | MERN Stack

- A MERN Stack-Based Car Rental Platform with User Authentication, an Admin Panel for CRUD Operation, and Razorpay payment integration.

Learning Management System | MERN Stack, MongoDB, Express.js, React.js, Node.js

- Learning Management System (LMS) using the MERN stack (MongoDB, Express.js, React.js, Node.js). The project included user authentication for secure login and access, along with comprehensive course management features for creating, updating, and deleting courses. I integrated real-time Admin Panel functionality to enhance Statistics and designed a responsive user interface to ensure a seamless experience across various devices. Additionally, I implemented RESTful APIs for efficient data handling, utilized MongoDB for scalable data storage, and employed Express.js for server-side logic and routing. React.js was used for building dynamic front-end components, while Node.js ensured smooth server-side operation

Personal Portfolio Website | React.js

- Developed a responsive Portfolio Website using React.js, featuring Home, About, and Contact page. Showcase skill, Project, and Professional experience with smooth navigation and optimized performance.
